NEW PRODUCT!

BBR CRF150R

BBR Motorsports adds a Billet Brake Pedal and Forged Aluminum Shift Lever to its 150R product line-up.

November 23rd, 2006 – Seattle, WA – BBR Motorsports continues its enthusiastic push into performance products for Honda's CRF150R. BBR has tapped its knowledge-base and leveraged its experience with four-stroke 150's into great upgrades for this incredible new bike. Here are the most recent results:

BBR CRF150R Billet Brake Pedal

This lightweight billet 6061 T-6 aluminum brake pedal replaces the stock steel pedal adding strength and saving weight. With three different tip location settings, it allows the rider to customize the fit and function of this important control. Pre-drilled for a brake snake, this brake pedal is ready to race, just bolt it on.

(120-HCF-1641, Brake Pedal - Billet Aluminum / CRF150R) $169.95

BBR CRF150R Aluminum Folding Shift Lever

This lightweight aluminum folding shift lever replaces the stock steel lever saving weight and improving function. Hi-strength forged aluminum construction with a durable knurled steel folding tip. Ti anodized finish.
Stronger and lighter than the stock shift lever.
Available in standard length and a youth version which is 3/8" shorter than stock.

(537-BBR-1008, Shift Lever - Aluminum Folding/ Standard CRF150R) $39.95
(537-BBR-1004, Shift Lever - Aluminum Folding/ Short CRF150R) $39.95

"We simply want the world to enjoy these bikes as much as we do. Developing products for the 150R is a pure passion for us…and for those of you wondering whether we are going to manufacture a BBR perimeter frame for the 150R…of course we are!" Brent Brown, General Manager, BBR Motorsports, Inc.
