- Use 3/4" to 1.5" of sag as per rider preference.
- Torque shock bolts to 29 ft. lbs.

KLX/DRZ110 2002-2009

Mount the shock with the hose towards the rear tire. Use the included hose clamps to mount the reservoir on the frame tube as shown. Mounted correctly the side panel will cover most of the reservoir.

KLX110/L 2010- Present

Mount the shock with the hose towards the rear tire. The hose should snake under the battery box as shown. Mount the reservoir with the included hose clamps to the lower frame tube as shown.

Installed correctly, the side panel will cover most of the reservoir.
