# Important Information Please Read

## E-6 Fork Kit Specs

BBR E-6 Fork Kits come **standard** with **175cc** per leg of **10wt** fork oil and **.50kg** fork springs. This setting works great for an average size adult of 150lbs under normal play riding conditions.

Fork settings should be fine-tuned for your weight and riding ability using different oil weights, oil volumes and springs.

### **Recommended BBR settings:**

RIDER	OIL WEIGHT	OIL VOLUME	SPRING RATE
80lb Beginner (kid) 125-150lb Play Riding 150-175lb Play Riding 175 and Up or Aggressive Riding	5 or 10wt 10 or 15wt 15 or 20wt 20 or 30wt	150cc per leg 175cc per leg 180cc per leg 180cc per leg	.50kg .50kg .50kg .62kg

#### **MINIMUM OIL 150cc**

#### **MAXIMUM OIL 180cc**

Optional fork oil weights can be found at your local dealer.

Optional .62kg fork springs (650-KLX-1105) can be purchased direct from BBR or from your local dealer.

#### **WARNING**

Excessive and/or continued fork bottoming, and/or using more thatn 180cc of fork oil per leg will result in leaking or blown fork seals. Replacement BBR fork seals are available (635-HXR-5200).

For assistanc e with fork kit installation or with fine-tuning your BBR E-6 fork kit, please contact your local dealer or contact technical support at BBR Motorsports at 1-888-668-6227.
